PROFESSIONAL SUMMARY

Bilingual English-Swahili quality specialist with 6+ years in scientific editorial review, AI output evaluation, and technical documentation. Native Swahili fluency combines with the editorial discipline to enforce terminology and style consistency across 150+ manuscripts a year at 100% style-guide adherence, and the analytical rigor to evaluate 500+ AI-generated outputs for accuracy and semantic consistency at a 98% inter-rater reliability score. This mix of language skill, subject-matter depth in technical and scientific content, full stack engineering, and direct experience judging AI-assisted output supports the accuracy and consistency work behind machine translation post-editing and localization quality assurance.

LANGUAGE PROFICIENCY

English (Professional) and Swahili (Native/Fluent). Raised and educated in Kenya, where Swahili is a co-official first language, alongside English used throughout professional and academic work.

CORE COMPETENCIES

Bilingual English-Swahili Communication | MTPE and Localization QA Readiness | Terminology and Style Consistency | Translation Memory Concepts | AI Output Quality Review | Technical and Scientific Subject-Matter Expertise | Labelling and Rubric Adherence | Cross-Functional Collaboration | Remote Data Ops

TECHNICAL SKILLS

Languages/Frameworks: Java, C, Python, Django, Django REST Framework, JavaScript/TypeScript, React, Next.js

Data/ML-Adjacent: Prompt Engineering, AI Output Annotation and Labelling, Dataset QA Auditing, Transcription

Infrastructure: PostgreSQL, MySQL, Docker, Git/GitHub, Redis, Celery, Linux (WSL)

Real-Time Systems: WebSocket, WebRTC

Others: LATEX; Microsoft Office (Word, PPT, Excel, Access etc); LibreOffice; Logisim

SOFT SKILLS

Technical Mentoring | Analytical Debugging | Deadline-Driven Delivery | Editorial Precision | Cross-Cultural Communication | Clear Written Feedback | Git

AI AND SOFTWARE QUALITY ASSURANCE EXPERIENCE

AI Data Evaluator/Annotator: *Independent/Contract*

- Evaluated 500+ AI-generated outputs against defined rubrics covering accuracy, relevance, semantic consistency, and safety, directly informing model alignment and response-quality improvements.
- Delivered high-fidelity image and video annotation with fine-grained action labelling for ML training datasets, sustaining a 98% inter-rater reliability score under strict labelling guidelines.
- Audited data pipelines systematically to catch missing, mislabelled, or inconsistent data points, protecting the integrity of training inputs for computer vision models.
- Applied root-cause debugging to AI-generated code snippets, identifying and resolving edge-case logic errors to improve output consistency, directly applicable to coding evaluation and quality review work.

PROFESSIONAL EXPERIENCE

Senior Scientific Editor: *Freelance* *2019–Present*

- Copy-edited and quality-checked 200+ scientific manuscripts a year, achieving 100% adherence to journal-specific style and terminology guides, the same discipline required to enforce brand and terminology consistency in enterprise localization work.
- Conducted structural and technical QA reviews that reduced author revision cycles by 20%, catching reference errors and data omissions before they reached publication.
- Sustained a 99% client satisfaction rating on high-stakes technical content under tight, deadline-driven production schedules.
- Partnered directly with international researchers across language and cultural contexts to preserve technical accuracy while improving clarity, direct experience with the cross-cultural precision that English-Swahili technical translation demands.

Assistant Python Instructor: *Power Learn Project Africa* *2022–2025*

- Delivered live Python and Django instruction to 800+ developers, driving a 90% course completion rate.
- Manually reviewed 1,200+ code submissions against a structured evaluation framework enforcing OOP principles, PEP8 standards, and Django best practices.
- Ran targeted debugging bootcamps that cut student troubleshooting time by 30%.
- Authored rubrics and learning materials translating complex backend concepts into scored, practical evaluation criteria.

Founder and Lead Developer: *DumaMeet* *Ongoing*

- Architected the real-time backend (Django, DRF, Django Channels, WebSocket/WebRTC) for an AI-ready video conferencing platform, including the database schema, auth, and org hierarchy.
- Structured a Celery/Redis microservices layer to preprocess audio/video streams, laying groundwork for automated transcription and meeting summarization.
- Containerized the full stack with Docker Compose for environment parity across the CI/CD pipeline.

Developer: *School Fees and Donations Payment System*

- Built and deployed a secure payment orchestration platform (Django, Pesapal, Visa APIs) with idempotent webhook handling for transactional integrity.

Developer: *Kesly Tours Booking Platform*

- Built a Django booking engine with WhatsApp Business API integration, improving customer response times by 40%.

EDUCATION AND CERTIFICATIONS

- BS Computer Science — University of the People (Sep 2025–Present)
- Cybersecurity Certification — ALX Africa (Nov 2023–Present)
- Software Development Certification — Power Learn Project Africa (Completed)
- Kenya Certificate of Secondary Education (KCSE) (Completed)
